SUMMARY

Dr Shah Johir Rayhan is a Professor of Agricultural Finance and Management at Sher-e-Bangla Agricultural University, Dhaka, Bangladesh. I am a multidisciplinary researcher with expertise in agricultural finance, value chains and markets, climate-smart agriculture adaptation, impact assessment, technology adoption, food security, food policy, and the evaluation of policy interventions using a quasi-experimental/RCT approach, as well as econometric modelling with cross-sectional and time-series data. I am also a master's/doctoral supervisor and a member of the departmental academic evaluation group. I completed my Bachelor of Science (BSc) in Agriculture (Hons.) from Sher-e-Bangla Agricultural University, earning First Class. I also completed a Master of Science (MS) in Agricultural Economics from Gazipur Agricultural University, where I ranked first in my class with a CGPA of 3.97 out of 4.00. In 2022, I received my PhD in Agricultural Economics and Management from the Institute of Agricultural Economics and Development of the Chinese Academy of Agricultural Sciences, with financial support from a Chinese Government Scholarship (CSC). I also completed an MBA in Finance from the American International University-Bangladesh and a Postgraduate Diploma in Financial Management from the Bangladesh Institute of Management (BIM). I have published more than 31 papers in peer-reviewed National and International journals, of which 8 are indexed in Web of Science/Scopus. I was the leader/co-leader of various research projects funded by national and international donors. I have experience working with the Food and Agriculture Organization of the United Nations (FAO) funded project of NFPCSP, Higher Education Quality Enhancement Project (HEQEP), National Agricultural Technology Project (NATP-2), Program on Agricultural and Rural

Transformation for Nutrition, Entrepreneurship, and Resilience in Bangladesh (PARTNER), etc., projects from competitive calls.

Areas of Expertise:

- Sustainable crop production
- Rural finance
- Climate change, food security and multidimensional poverty
- Climate-smart agriculture
- Conservation agriculture and organic farming
- Agricultural Technology Adoption
- Value chain analysis
- Impact evaluation of policy intervention using an RCT approach
